

Story 1

Electricity Consumption Analysis in India	Electricity Consumption in 2019	Electricity Consumption in 2020	Region wise Electricity Consumption	Total Consumption	Year-wise Electricity
---	---------------------------------	---------------------------------	-------------------------------------	-------------------	-----------------------

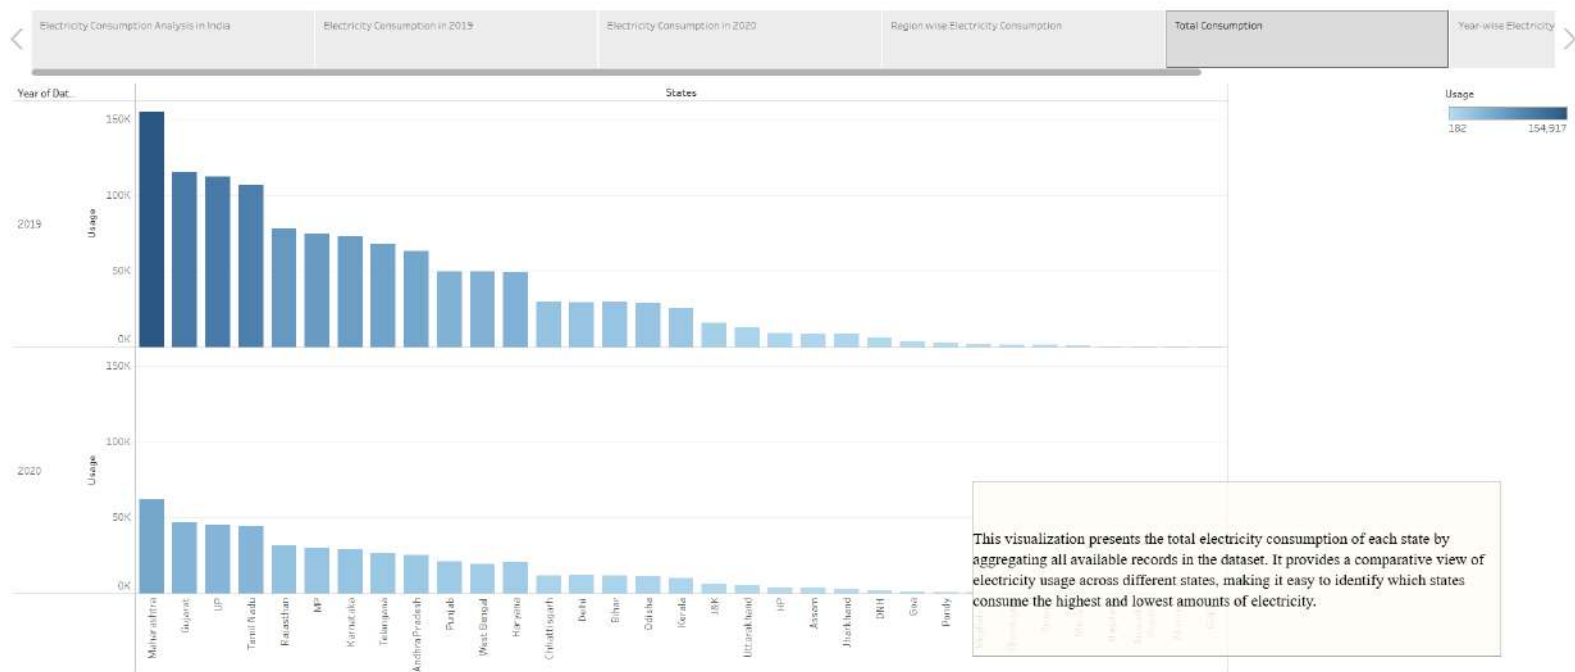

The interactive dashboard combines multiple visualizations into a single interface, allowing users to explore electricity consumption from different perspectives. Users can filter data by state, region, year, and electricity usage to perform detailed analysis.

The dashboard includes geographical maps, pie charts, bar charts, and filters that help users identify consumption patterns quickly. Instead of manually analyzing thousands of records, the dashboard provides meaningful insights in an easy-to-understand format.

This project demonstrates how SQL and Tableau can be integrated to transform raw electricity consumption data into valuable business insights. The interactive nature of the dashboard makes it suitable for decision-making, reporting, and future electricity demand analysis.

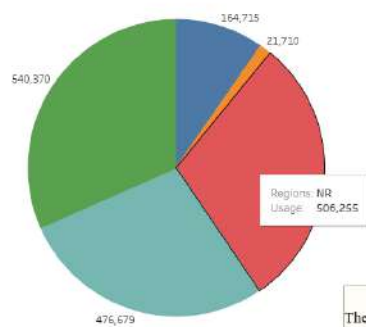

Story 1

Electricity Consumption Analysis in India | Electricity Consumption in 2019 | Electricity Consumption in 2020 | Region wise Electricity Consumption | Total Consumption | Year-wise Electricity

The pie charts compare electricity consumption across Indian regions such as Northern, Southern, Western, Eastern, and North-Eastern regions. The year-wise comparison highlights changes in regional electricity usage between 2019 and 2020.
