

Performance Testing Report

1. Objective

Performance testing verifies that the dashboard, database, and web application function correctly under normal usage.

2. Test Cases

Test ID	Test Case	Expected Result	Status
1	Database Connection	Successful	Pass
2	Dataset Loading	All records loaded	Pass
3	SQL Queries	Correct output	Pass
4	Tableau Dashboard	Displays correctly	Pass
5	Tableau Story	Displays correctly	Pass
6	Dashboard Filters	Working properly	Pass
7	Flask Website	Opens successfully	Pass
8	Dashboard Embedded	Successful	Pass
9	Story Embedded	Successful	Pass
10	GitHub Repository	Accessible	Pass

3. Dashboard Validation

Visualization	Status
Bar Chart	Pass
Pie Chart	Pass
Line Chart	Pass
Area Chart	Pass
Map	Pass
Heat Map	Pass

4. Filter Testing

Filter	Result
Year	Working
State	Working
Region	Working
Sector	Working

5. Conclusion

All functional and visualization components operated successfully. The dashboard, story, filters, and Flask application met the expected project requirements.
